

FICHE-TYPE COLLOQUE CENSUS

Nom de la ressource:

Manuscripta Mediaevalia (MM)

Handschriftenportal (HSP - variant information concerning this project in italics)

Électronique/papier (adresse, références)

www.manuscripta-mediaevalia.de

Langue des manuscrits

Latin, german, further vernacular languages (french, italian), greek.

Limites chronologiques

MM :

No strict limits, but focus lies on medieval manuscripts; modern autographs or personal papers are no subject to the database.

HSP:

Medieval and modern book-manuscripts.

Limites géographiques

MM

Basically focused on German institutions (libraries, archives).

HSP:

Designed to be the central portal for the cataloguing and digitization of book-manuscripts in German institutions.

Nombre de manuscrits

Approximately 120.000 documents on about 115.000 manuscripts.

Type de description (signalement des cotes, inventaire sommaire, catalogue scientifique, etc.)

MM:

All levels of description from various cataloguing traditions and ways of data gathering are present: 35.000 scientific descriptions in full text, 40.000 scientific descriptions as index

entries, 35.000 converted documents from older catalogues and inventories, 5.000 dummies with links to catalogue-images.

HSP:

Different cataloguing- (old - new, scientific - inventory) and data-qualities (full-text - index-only) shall be marked.

Modalités de description du contenu des mss.

The content-descriptions basically follow the cataloguing-rules of the DFG (german research foundation). Older descriptions and inventories may vary from this.

Sources d'informations (autopsie, images, catalogues, autre bibliographie, bibliothèques, autres bibliothèques, institutions patrimoniales, instituts de recherche, etc.)

Sources for gathered data are either primary data-capturing of descriptions or the conversion of various types of manuscript catalogues. Both sources are originally based on autopsy. Selected older catalogue-data has subsequently been complemented by current information.

Référentiels utilisés pour les cotes

MM :

Owning institution gives guidance for respective catalogue. Shelf-mark-information from catalogue is transferred into the data. Incoherent (shelf-mark)-data has partly been normalized.

HSP:

Project will talk back to owning institutions for an authority-syntax of their shelf marks. This syntax will be applied to the existing data. Information will be handed to the GND (Gemeinsame Normdatei) as authority-data for reuse (class: works - cultural objects).

Référentiels utilisés pour les noms de personnes (et collectivités) et les textes

MM:

For personal names: GND as authority file. Literary works, place-names, institutions as well as personal names who are not (yet) part of the GND undergo MM-internal standardization.

HSP:

GND-linking for persons, institutions, place-names and literary works.

Liens vers d'autres ressources en ligne (présence/absence, type, modalités techniques [automatiques, semi-automatiques, manuels], quantité)

HSP:

Linking to WZIS (watermarks) and EBDB (binding) (SRU ?); data-exchange with partners

(locally/regionally and/or thematically oriented services).

Informations complémentaires sur les manuscrits présents dans la ressource: types (images, bibliographie, etc.), quantité.

MM:

Links to manuscript images (internal and distributed services), 13.000 objects.

Links to local electronic bibliographical documentations in Munich and Wolfenbüttel.

HSP:

Aims to be complete index of all digitized manuscripts in German institutions (integration of and linking to images).

Identifiants stables (cotes, personnes, textes, etc.); nature (significatifs ou non, etc.)

MM:

All descriptions have permanent addresses; not indicative.

HSP:

Permanent addresses for all entities (descriptions and their parts: binding, texts, fragments etc.; persons, institutions, literary works).

Autres ressources papier/électroniques sur le même domaine (langue, aire géographique, etc.)

German manuscripts: Handschriftencensus

Illustrated German manuscripts: KdiH

Distributed local ressources (library or archival online-catalogues)

Date de création

MM:

Started 1996, online since 2000.

Projet en préparation/ en cours /achevé

MM:

Running ; shall be replaced by HSP.

HSP:

DFG-funding applied for. Project could start in 2018.

Noms et coordonnées des responsables

MM:

Staatsbibliothek zu Berlin

Bayerische Staatsbibliothek München

Deutsches Dokumentationszentrum für Kunstgeschichte, Foto Marburg

HSP:

Staatsbibliothek zu Berlin

Bayerische Staatsbibliothek München

Universitätsbibliothek Leipzig (HSP-project-partner)

Herzog-August-Bibliothek Wolfenbüttel (HSP-project-partner)

Nombre de collaborateurs réguliers

MM:

Currently three employees in the supporting institutions.

HSP:

Group of project-cooperators.

Modalités d'interactions avec les autres institutions culturelles, patrimoniales et de recherche

MM is and HSP will be supervised by the consortium of German manuscript centres and its international scientific board of advisers.
